

INDIA DEVELOPMENT PARTNERSHIP ACTIVITY

The Asia Foundation
Improving Lives, Expanding Opportunities

The United States (U.S.) and India share a common vision for a free and open Indo-Pacific region. India's role as a development leader and preferred partner in the Indo-Pacific region will be further leveraged in collaboration with the U.S.

The India Development Partnership Activity (IDPA) is a 3-year cooperative agreement aimed at enhancing India's development cooperation footprint in the Indo-Pacific and achieving shared goals for the development of the region.

IDPA will focus on three priority areas where India demonstrates policy leadership, practical experience, and sustainable results.

In countries across the region, IDPA will establish demand-driven partnerships, including through South-South Cooperation, using the 4E approach (engage, explore, expand, and establish).

The Asia Foundation is a non-profit international development organization committed to improving lives across a dynamic and developing Asia. Informed by six decades of experience and deep local expertise, our work across the region addresses five overarching goals—strengthen governance, empower women, expand economic opportunity, increase environmental resilience, and promote international cooperation.

For more information, please contact Mr. Atul Kaushik, Chief of Party, India Development Partnership Activity, The Asia Foundation, New Delhi, India.

ENGAGE

Centers of Excellence (CoE),
Training Institutions (TI),
Private Sector in India and
partner countries

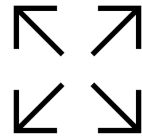

EXPLORE

Climate Smart Agriculture,
Disaster Risk Reduction,
Renewable Energy and
beyond

EXPAND

Operations of IDPA
to other sectors of
mutual interest of
India and partner
countries

ESTABLISH

Triangular cooperation and
build Indo-U.S. capacities in
the Indo-Pacific

Climate Smart Agriculture

Environmentally, socially, and economically sustainable agri-technologies will increase farm productivity and efficient use of resources while reducing greenhouse gas emissions through an integrated approach. IDPA will promote partnerships to promote climate resilient food production in the region.

Disaster Risk Reduction

The Indo-Pacific is a disaster-prone region sharing a common interest in strengthening disaster management and risk reduction. India has experience managing and mitigating a variety of scenarios. Leveraging this, IDPA will bridge the science, technology, capacities, and management of disasters for stronger regional preparedness, adaptation, and resilience against increasingly frequent natural disasters.

Renewable Energy

India is one of the top five installers of green capacity in the world with steadily increasing renewable energy targets and investments. Building on this, IDPA will identify cooperation opportunities to support transition to renewable energy leading to low carbon pathways in partner countries
