The APEC Traveler App would make it possible for travelers to confirm their COVID-19 vaccination status at APEC country border crossings and immigration checkpoints using a QR code. This innovative App would help support the potential to increase prosperity and inclusive growth. This year's winner, the APEC Traveler App would contribute to as a positive path forward for the people of Afghanistan as their families. We are suspending activities at this time. With a deep and continued commitment to our mission, as well as the health and safety of our teams and partners around the world, we have put in place a plan that prioritizes the safety of our staff and contributors.

Given the challenging security environment in Afghanistan, The Asia Foundation has put into place a plan that prioritizes the safety of our staff and contributors. We are suspending activities at this time. With a deep and continued commitment to our mission, as well as the health and safety of our teams and partners around the world, we have put in place a plan that prioritizes the safety of our staff and contributors.

Similarly, water challenges and food insecurity in the Mekong Basin are closely tied to climate change. In this edition of Development Letters, we explore how climate change is affecting water resources and food security in the region, and what steps can be taken to address these challenges.

This episode of InAsia highlights the recent study of the intersection of water access, poverty, and gender in the Stung Chinit Watershed in Cambodia. This research includes a survey that documents the impact of water access and climate change on the lives of women and children in the area.
