

"This winter was my happiest winter. My children didn't catch a single cold this winter, and they didn't take any medicine. This has saved a lot of money for the family.."

B.Purevkhuu

"Considering that we had a stove, we were able to spend our extra time doing flowers and handicrafts, and the household income increased significantly by 2-3 times. I even have time to rest and sleep."

M.Badamsuren

"For someone like me who stays at home and does many things, not having a stove has been a huge help. It's comfortable and timesaving even when I bring clients home and do my work. I sew, do nails, attach buttons and clasps to traditional garments, cook meals, and my friends often gather at my place. It benefits every aspect of my life. Recently, I've started sewing car seat covers. I also have many more ideas and plans for the future."

B.Oyuntsetseg

"Instead of dealing with a stove, I can calmly focus on my work and growing my business. At home, it's warm and I no longer worry about carbon monoxide poisoning during the night. Since getting solar panels, I've been planning to make my home even more comfortable and beautiful. In any case, I'm thinking of installing parquet flooring."

B.Nyamjargal

"The thing I am most grateful for is the safety at home "ger". In the past, I fell into the fire stove several times got burned. Because of my health condition, I had constant fear of falling again into the fire again. Now, my children don't worry about me, and I don't worry about my little one in case if she gets burns from the coal stove. All of us now live without fear and micro accident worries."

G.Odgerel

"Since we stopped burning coal, there have been no more fights [at home]. There is no more saying, "You go to get the coal, you carry the coal bucket, you do this." As a mother, I am very satisfied with providing a comfortable environment with positive energy for my children. I will live only with this [solar panel]."
